Reasons For Allowance

The following is an examiner's statement of reasons for allowance: The claimed invention provides novel use of server modules operative with one another in a client/server network.

The combination of the server modules that interact together to form a flexible and scalable framework for obtaining, storing, retrieving, and implementing information was not taught or suggest by the prior art of record. Specifically the prior art does not teach or suggest: a case status module, the case statue module encompassing all case specific information and all activities associated with the case, as read in the supporting portion of the specification at page 24, paragraph 103; an intake module, the intake module being used to retain and reference various charges, government agencies, and related contact information as read in the supporting portion of the specification at page 24, paragraph 104; a role module, the role module used to retain report information and descriptions of the tasks of the various people associated with one or more cases, as read in the supporting portion of the specification at page 24, lines paragraph 105; an accounting module, the accounting module used to track billing invoices and their payment status, in which time and expense information can be input and stored through the accounting module, and invoices can be generated via a third party accounting package, as read in the supporting portion of the specification at page 24, paragraph 106; an alert distribution module, the alert distribution module used for issuing alerts, such as docketing items indicating that some activity is due to be completed on a certain date, as read in the supporting portion of the specification at page 24, paragraph

107; a correspondence distribution module, the correspondence distribution module handling correspondence that is sent to the server, and tracked by the correspondence distribution module, as read in the supporting portion of the specification at page 24, paragraph 108; a document distribution module, the document distribution module ensuring that documents associated with the various cases remain stored, searchable, and retrievable by the various people associated with the case, as read in the supporting portion of the specification at page 24, paragraph 109; and a client information module, the client information module containing all information about the client, its business, its primary contacts, organizational structure, divisions, locations, unions, and one or more specifications affecting the performance of the intended operator of the system, as read in the supporting portion of the specification at page 24, paragraph 110. The combination of all of these modules in specific operative relationship with each other result in an improved document generation and management system which was not taught or suggested by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
